- Restores Hardened Brushes—Oil and Latex
- No harsh chemicals
- Ready-to-Use Formula
- Cleans fresh water based coatings

BRUSH CLEANER—ZERO VOC

Description

An environmentally friendly brush cleaner that does not contain any harsh solvents. This product can be reused and is water rinsable. Brush Cleaner has a VOC of zero. The product provides a quick, safe and easy method to clean and care for paint brushes.

Application

Cleans and restores all types of bristle brushes. Removes hardened oil paint, varnish, enamel, lacquer, shellac and dry latex paint. Cleans wet oil base coatings from brushes.

Directions

Cover bristles with brush cleaner and soak. As paint softens, open bristles to speed action. Soak hard paint overnight or until paint becomes soft. Suspend brush in soaking container to prevent curling of bristles. Paint will soften more quickly if product temperature is between 70°-90°F. Work brush in product and press out dirty cleaner and paint. Then wash brush in warm solution of Savogran Dirtex, TSP or other detergent in water. Scrub bristles with nylon pot scrubber if necessary. Work solution through brush until bristles are not sticky. Rinse in clear water. Shape and straighten wet bristles. Wrap brush in paper to conform with original shape and lay flat to dry. Pour used brush cleaner into labeled container, close cover and let paint sludge settle out. Clear liquid may be reused.

Important label information

CAUTION: HARMFUL IF SWALLOWED. EYE IRRITANT ON CONTACT. Before use, always read all information and warnings on container. Material safety data sheet available upon request.
