## **THINX LATEX PAINT EXTENDER**

- Thins latex paint and waterbased clear finishes
- Cleans brushes, spray guns, rollers and latex paint spatters
- Extends open time
- Zero VOC and odorless
- Biodegradable

# Thinx Latex Paint Extender

## Description

Thinx Latex Paint Extender has been formulated to thin latex and waterbased paints, enamels and clear finishes to enhance flow and leveling. Cleans latex paint from paint brushes, leaving bristles soft and supple. Thinx Latex Paint Extender is also great for cleaning wet paint from rollers, sprayers, buckets and paint trays.

## Application

The product enhances flow and leveling. Clean tools, guns, brushes, spatters and overspray when paint is wet.

## Directions

(Not for use with oil based finishes). For thinning paint: add between 2 to 6 ounces per gallon of paint. Do not over thin. For cleaning tools: Pour enough Thinx into a plastic, glass or aluminum container to cover bristles, roller or gun. Swirl wet brushes or rollers around in thinner to thoroughly clean paint residue from roller nap, bristles and heels of brushes. May be rinsed with water. Spray Thinx through guns. To clean hardened brushes, rollers, etc. Let soak overnight or until paint is soft; follow directions for wet paint above. Rinse in water, wipe clean with paper towel or clean rag. To clean paint spatter: Dampen a clean rag with the product and rub spots lightly. Finish clean up by wiping with a dry rag. To rejuvenate old semi jelled latex paint: Take a small sample of jelled paint and add the product in small increments while stirring paint. Do not over thin. When proper consistency is achieved, spread sample to test drying ability. If satisfactory, repeat process with balance of jelled paint.

## Important label information

CAUTIONS: Can cause mild eye irritation. Before use, always read all information and warnings on container. Material safety data sheet available upon request.
