Oxalic Acid Marine Cleaner

Description

Savogran Oxalic Acid Marine Cleaner effectively cleans boat hulls removing “tea” stains, algae stains, dirt and grime. The product cleans and brightens teak and mahogany. Easily removes rust and tarnish from stainless steel and aluminum.

Application

The product can be applied with a scrub brush or with a pump up sprayer. The product is a powder which is mixed with water. Three tablespoons of cleaner makes one gallon of cleaning solution. The 12 ounce package will make four gallons of cleaning solution and cover approximately 1600 square feet of surface.

Directions

BEFORE USE, read all information on container. Protect eyes with goggles and wear rubber gloves. Protect skin from splashes. Do not breathe spray mists. Do not mix with chlorine bleach or other chemicals.

- Dissolve 3 tablespoons per one gallon of water.
- Apply solution with scrub brush or sprayer
- Triple rinse repeatedly with clean water and allow to dry. If top coating with a water base finish, rinse with a solution of one tablespoon baking soda per one gallon of water. Keep galvanized trailers wet with fresh water during application and rinse thoroughly when finished.

Important label information

DANGER: Contains Oxalic Acid. Avoid contact with skin and eyes. May cause burns or irritation. Harmful if swallowed. Do not breathe dust. DO NOT allow solution to get into gloves or soak through clothing to skin. Before use, always read all information and warnings on container. Material safety data sheet available upon request.
