Flash Point: 24°F (T.C.C.)
Viscosity: >60 Seconds/#4 Ford Cup
WPG: 7.22 lbs.
pH (1% in H₂O): 6-7

USE INSTRUCTIONS

Brush product on surface to be stripped with a natural bristle paint brush. Use a heavy, even coat with a loaded brush stroking in one direction only. Leave the remover surface undisturbed until the old finish is completely lifted or softened as determined by a scrape test. Allow approximately twenty minutes for coating to be loosened. The exact time for a particular coating can be determined by testing. When the old finish is completely softened remove the sludge with a scraper or coarse rags. Stripped surface should be cleaned with a good cleaner to remove all remover residue.

Savogran offers a customer service lab that will determine optimum dwell time and appropriate cleaning agent upon request.

SAFETY PRECAUTIONS: DANGER: FLAMMABLE. Keep away from sparks, heat and flames. If exhaust fans and/or pumps are used, the motors must be explosion proof. Avoid contact with eyes, skin and clothing. Use with adequate ventilation. Avoid breathing vapors. See material safety data sheet for more complete information.
